East Central Street Reconstruction

On Monday, November 4, CalPortland Construction, under contract with the City of Santa Maria, will begin the reconstruction of East Central Street from Miller Street to College Drive. This project is anticipated to take two weeks.

The work includes pulverizing the existing roadway surface, grading, compaction, and the installation of a new asphalt surface.

The driving public may experience delays due to roadway lane closures during construction. The City strongly recommends that drivers obey all temporary construction traffic control signs and flagmen, and use alternate routes whenever possible to avoid delays in travel time.

The funding source is from gas tax revenues, Measure A half-cent sales tax revenues used fund local transportation projects, and State and Local Partnership (SLPP) funds.

Questions may be directed to the Department of Public Works, 925-0951 ext. 225.
