Sign(s) to be installed by: _____ Contractor's Lic. # _____

Address: _____

Contact Person: _____ Telephone: _____ Email: _____

Workers Comp. Policy No.: _____ Ins. Co.: _____ Current City Bus. Lic. ___yes ___no

Property width (in feet): _____ Building frontage (in feet): _____

Value of all proposed signs \$ _____

Are there any signs on the property now? _____ How many? _____ If so, which sign(s) will remain and which will be removed? _____

Describe sign(s) proposed to remain and show on site plan. _____

How many signs are proposed? _____ Describe each proposed sign. If more than three signs are proposed, use reverse side and check here.

Sign #1:

Type of sign* _____ Dimensions _____

Size in square feet _____ Material _____

Colors _____ Lighted (yes or no) _____

*Type of sign; specify by letter: (a) wall, (b) blade, (c) canopy, (d) suspended, (e) monument, (f) subdivision (g) other (describe here) _____

Sign #2:

Type of sign* _____ Dimensions _____

Size in square feet _____ Material _____

Colors _____ Lighted (yes or no) _____

*Type of sign; specify by letter: (a) wall, (b) blade, (c) canopy, (d) suspended, (e) monument, (f) subdivision, (g) other (describe here) _____

Sign #3:

Type of sign* _____ Dimensions _____

Size in square feet _____ Material _____

Colors _____ Lighted (yes or no) _____

*Type of sign; specify by letter: (a) wall, (b) blade, (c) canopy, (d) suspended, (e) monument, (f) subdivision, (g) other (describe here) _____

- This application must be accompanied by 2 copies of:**
- A. A dimensioned site plan, identifying location of each sign.
 - B. Building elevations showing the location of all proposed signs and existing signs.
 - C. A dimensioned detailed drawing of the surface area of each proposed sign, drawn to a standard engineering or architect's scale (such as 1/8"=1', 1/10"=1', etc.). Surface area is defined in Sec. 12-2.136(u) of the Municipal Code, and is computed by drawing an enclosure around the sign (including a contrasting background), using no more than 8 straight
 - D. Materials and colors shall be shown. The overall height and distance to property lines shall be shown for any proposed monument or freestanding signs.
 - E. Electrical cross section detail shall be shown, if applicable. Fastening details of the sign to the building shall be shown.
 - F. Footing details shall be shown for freestanding signs. Engineering calculations may be required.
 - G. Although not required, it will facilitate the processing of the application if polaroid photographs of the property are included, showing all sides of the building where signs are existing or proposed.

Sign #4:

Type of sign* _____ Dimensions _____
 Size in square feet _____ Material _____
 Colors _____ Lighted (yes or no) _____

*Type of sign; specify by letter: (a) wall, (b) blade, (c) canopy, (d) suspended, (e) monument, (f) subdivision, (g) other (describe here) _____

Sign #5:

Type of sign* _____ Dimensions _____
 Size in square feet _____ Material _____
 Colors _____ Lighted (yes or no) _____

*Type of sign; specify by letter: (a) wall, (b) blade, (c) canopy, (d) suspended, (e) monument, (f) subdivision, (g) other (describe here) _____

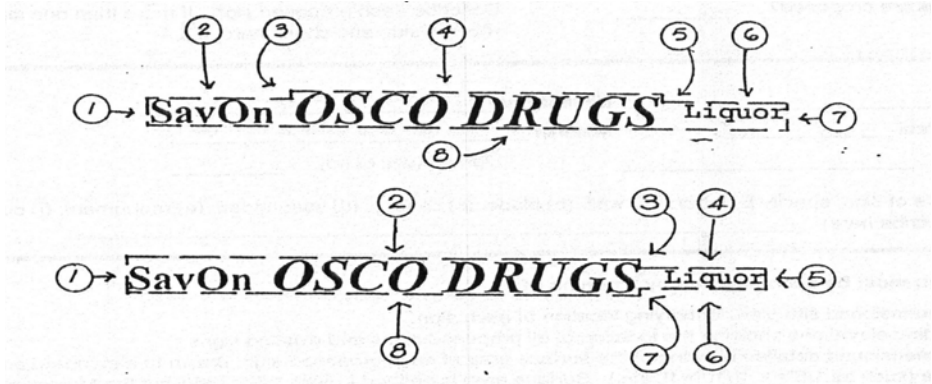

Sign #6:

Type of sign* _____ Dimensions _____
 Size in square feet _____ Material _____
 Colors _____ Lighted (yes or no) _____

*Type of sign; specify by letter: (a) wall, (b) blade, (c) canopy, (d) suspended, (e) monument, (f) subdivision, (g) other (describe here) _____

SIGN AREA COMPUTATION

The area of a sign is computed by forming a box to enclose the entire sign. The box must be a continuous line consisting of not more than 8 straight lines that form right angles. The area within the box shall be the sign area. There may be more than one method to calculate the area of a sign, as shown on the drawings.

FOR OFFICE USE ONLY
